

Government Guidelines for Accident Prevention

1. Workplace Safety

- **Guideline:** Ensure that workplaces adhere to safety standards and provide proper training for employees.
- Scheme: National Safety Council (NSC) Program Provides guidelines and training for workplace safety and accident prevention.

2. Use Personal Protective Equipment (PPE)

- **Guideline:** Provide and enforce the use of appropriate PPE such as helmets, gloves, and safety goggles.
- Scheme: Personal Protective Equipment Grant Program Supports the purchase and distribution of PPE for workers in high-risk industries.

3. Traffic Safety

- **Guideline:** Follow traffic rules, wear seat belts, and avoid distractions while driving.
- Scheme: Road Safety Campaign Promotes road safety awareness and conducts traffic enforcement programs.

4. Emergency Response Training

- **Guideline:** Conduct regular emergency response drills and provide first aid training.
- Scheme: Emergency Preparedness and Response Program Offers training and resources for emergency preparedness and first aid.

5. Safe Handling of Equipment

- **Guideline:** Ensure proper training on the use and maintenance of machinery and equipment.
- Scheme: Safe Machinery Operation Initiative Provides guidelines and training for safe equipment handling and maintenance.

6. Building Safety

- **Guideline:** Regularly inspect and maintain building structures, including fire alarms and exits.
- Scheme: Building Safety Inspection Program Conducts inspections to ensure compliance with safety regulations.

7. Public Awareness Campaigns

- **Guideline:** Engage in public education campaigns to raise awareness about accident prevention.
- Scheme: Accident Prevention Awareness Program Conducts workshops, seminars, and media campaigns to promote safety.

8. Reporting and Investigation

- **Guideline:** Encourage the reporting of accidents and near-misses, and conduct thorough investigations.
- Scheme: Accident Reporting and Analysis Program Provides resources for reporting and analyzing accidents to prevent future incidents.
